Hi Debbie,

The project for the conversion of multi family and commercial solid waste pickup from private arrangements with individual contractors to a central contract(s) managed by the City is ongoing. Staff are reaching out to the approximately 350 commercial and strata properties to obtain existing collection details before issuing a Request for Proposals this summer.

Plans are that individual properties can sign up for the City managed collection service with fees to be paid similar to existing water utility fees by January 2023. In any case properties will be charged the new collection fees starting in January 2024, so they are advised to terminate their current collection contracts before that time.

Hope this helps,

Jim
